Algemene uitleg

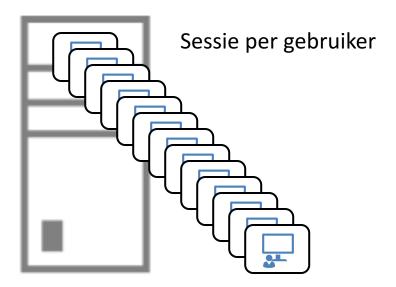

Server Based Computing
 "Server-based computing (SBC) is an over-arching term
 refering to the technology by which applications are
 implemented, controlled, supported and functioned on
 the server instead of the client."

- Server Based Computing "uitgevonden" door Citrix
 - Multi User OS/2 (IBM)
 - Multi User Win NT 3.51 (Multi Win; apart OS van Citrix: WinFrame)
 - Multi User NT 4 (Terminal Server, aparte OS versie van Microsoft; Citrix als "add-on")

- Server Based Computing
 - Multi User Windows 2000-2003 (Terminal Services;
 Citrix als "add-on")
 - Multi User Windows 2008 R2 en hoger (Remote Desktop Services; Citrix als "add-on")

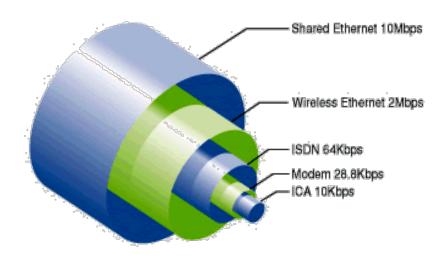

Server Based Computing:

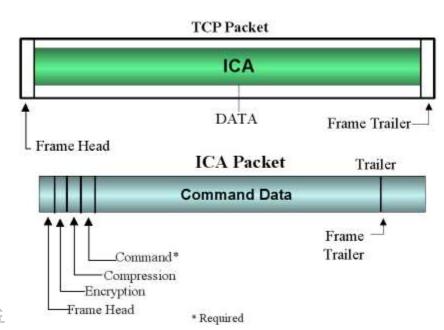

- Nodig voor Server Based Computing (onder anderen)
 - Multi User OS
 - Protocol om:
 - toetsenbord en muis van client naar server te krijgen
 - Beeld van server naar client te krijgen (resultaat van de input)

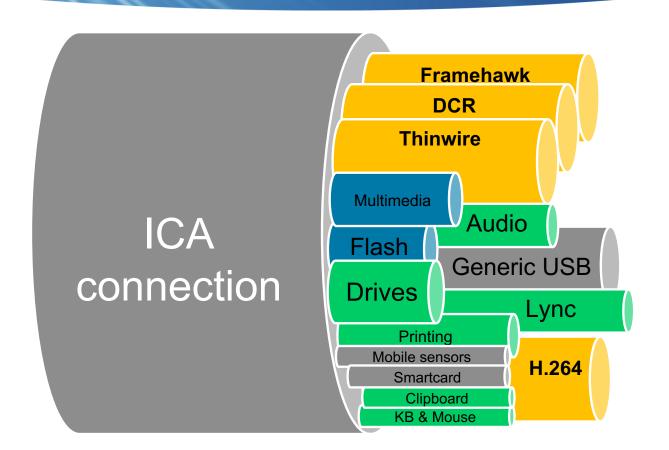

ICA is optimized for connections as low as 14.4 Kbps. Only mouse clicks, keystrokes and screen updates travel the network to generate exceptional performance.

High Definition Experience

HDX Broadcast ICA and RDP protocol support for access

HDX Plug-n-Play

Access to local resources and peripherals, including USB devices and printers

HDX MediaStream Video and audio playback

from any device, anywhere

HDX RichGraphics

2D/3D graphics incl. Adaptive Display, HDX 3D Pro and Microsoft RemoteFX

HDX RealTime Voice and video for real-time collaboration

HDX WAN Optimization

Performance and bandwidth optimizations for branch offices with Citrix CloudBridge

HDX Mobile

Touch navigation for Windows apps; local device features

HDX Adaptive Orchestration

Best user experience based on server, network connection and user device

- Voordeel SBC "Upgrading hardware, application deployment, backing up of data and technical support are simplified in a server-based environment." -> want uitvoeren op de *Server*

Voordeel SBC
 "As PCs turn into terminals and may get replaced by much simpler, more cost-effective and more convenient-to-manage devices known as thin clients."
 -> PC (client) niet meer belangrijk

 Nadeel SBC
 Als alles wordt uitgevoed op de server en er gaat iets mis met de server...

- Door succes SBC:
 - Uitbreiding naar desktop virtualizatie: VDI
 - Citrix XenDesktop
 - VMware View

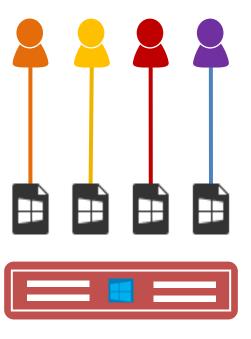

• VDI:

Desktop per gebruiker

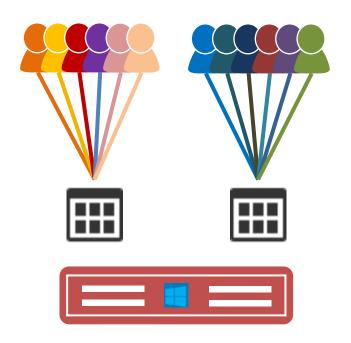

Desktop Virtualization

Session Virtualization

Diversiteit aan SBC en VDI oplossingen -> EUC

Ontwerpen, inrichten en beheren van onder andere oplossingen op het gebied van:

- private, hybride en full cloud workspaces;
- dynamische en klassieke desktop;
- bring-your-own-device en/of choose-your-own-device;
- application security en smart access;
- platform en applicatie lifecycle management;
- terminal server, VDI en thin client-oplossingen;
- applicatie- en desktopvirtualisatie.

EUC techniek

Remote Desktop Services

- Windows 2012 R2
- Advanced RDS deployment
- Remote Desktop (RDSH en VDI)
- RemoteApps
